12 for \$35.95. (Order early, supply limited.)

The Universal Southern
Flowering Shrub
Crape Myrtle

Loaded with
Blooms All
Summer Long!

Famous
Dixie Brilliant
Crape Myrtle

Shells so thin they may be easily cracked by hand, coming out whole or in halves for ideal table use as well as for commercial purposes. Quality and flavor comparable to Stuart, from which it came. Rapid, vigorous-growing tree with rather large foliage to make superb shade as well as good crops of nuts. Bears in 4 to 6 years. (Some trees in nursery have produced nuts when only 3 years old.) Treat the HASTINGS' PECAN the same as other grafted varieties, with spacing 60 x 60 (12 trees per acre) in large plantings. Planting instructions sent with every order.

NEW DIXIE BRILLIANT CRAPE MYRTLE

Plant Them Everywhere in the South

F525/10 NEW DIXIE BRILLIANT CRAPE MYRTLE. Marvelous new, richer, deeper watermelon-red and very prolific variety for any sunny location.

Delivered—97c each. 3 for \$2.29. 10 for \$6.29. 25 for \$13.89. 100 for \$49.89. 500 (for civic planting) for \$225.00.

FOR HOME AND CIVIC PLANTINGS

There are not too many shrubs adapted to sidewalk plantings so it is wonderful to have here in the South the famous Dixie Brilliant Crape Myrtle which is ideally suited for such use. It is an ideal plant for the home grounds as well. **CRAPE MYRTLE. Lagerstroemia indica.** Favorite flowering shrub of the South. A heavy bloomer growing 10 to 15 feet high. Splendid for lawn specimens and gorgeous street plantings. After setting new plants, mound soil over lower branches to induce quicker sprouting the following spring.

CHINESE CHESTNUTS (Blight-Resistant)

The South's Newest Cash Crop

Plant early for thrifty growth! Harvest crops within 3 to 4 years—more and more as the trees develop. Successful everywhere that peaches or apples will grow! Sweet, delicious, meaty nuts sell on sight and are even larger and sweeter than native chestnuts which have now all but completely disappeared because of blight. Authorities recommend setting trees 30-40 feet apart, planting 3 or more to insure crossing necessary for heaviest nut production in small plantings. Ideal for yard planting. Commercial groves are producing heavy crops every year at good profits. Plant 27 trees per acre set 40 feet apart each way utilizing open spaces for summer and winter soil-building legumes until trees are too large. **Always plant 2 or more trees for cross pollination.**

N13/10 CHINESE CHESTNUTS DELIVERED PRICES—3 for \$1.95. 6 for \$3.69. 12 for \$6.95. 25 for \$11.95. 100 for \$39.95. Plant 27 trees per acre (40 ft. x 40 ft.)

HASTINGS' SEEDS FOR DIXIE'S GARDENS

FLORISTS AND PLANT GROWERS NOTE TRADE PRICES IN OUNCE AND PART OUNCE PACKAGES!

All Users Can Save Money by Buying Hastings' Superior Flower Seed, Plants and Bulbs Because They Give Better Results.

In sixty-eight years of experience in serving Southern gardeners we have consistently bred and selected strains as well as varieties of flowers and vegetables that are best suited and acclimated to our Southern conditions. These following pages are filled with tested and proven kinds for your garden—new All-America winners; yes and better strains of Mother's and

Grandmother's day favorites. Under the supervision of Mr. Donald Hastings Sr. we conduct the Southern regional flower and vegetable All-America test or demonstration gardens; therefore we believe we are better equipped to serve you than any other firm in the entire world. Let us prove it now for this year. Hastings' Seeds come in safety sealed packages each dated for freshness.

HASTINGS' "DIXIE STRAIN" FLOWERS

Flower Seeds, Bulbs and Nursery Stock for Spring Planting are described on the following pages. For Hedges, Evergreens, Shrubs, Trees and other Hardy Outdoor Nursery Stock, see pages 33-44. In the listing of flower seed the following abbreviations are used: TA, Tender annual. HA, Hardy annual. HHA, Half hardy annual. HB, Hardy biennial. TP, Tender perennial. HP, Hardy perennial. ★ means dwarf growth suitable for rock gardens or similar situations.

PLANNING THE FLOWER GARDEN

Make a plan for final or lasting results. Unsightly places, as back yards, fences and house foundations should be screened from view—all other views left unobstructed except by low-growing plants. Plan to show off the home as a pleasing sight. Don't jump in and patch up your place for immediate results. Plan to add to the beauty of your home each year.

There is nothing mysterious about success with flowers. They require care and common sense. The work cannot be left to a farm hand. It must receive careful personal attention. By observing the following rules you will have little cause for failure.

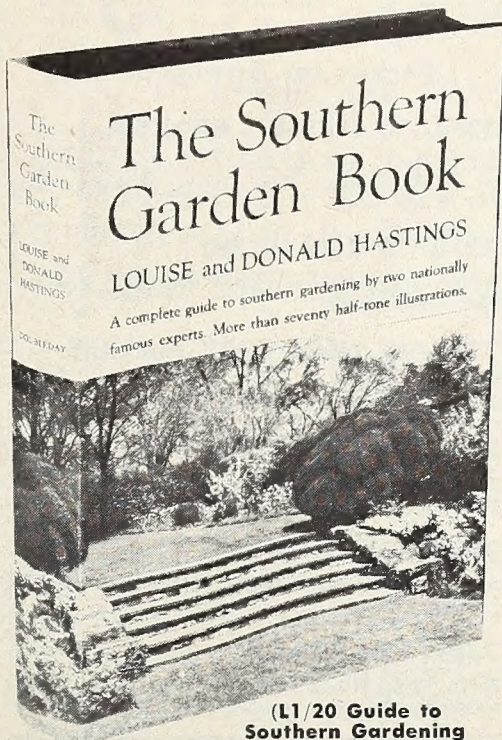

Remember, that with the best plants and flowers your garden can well be the show place of the community.

THE SOIL FOR YOUR FLOWERS

A mellow loam, which is a medium soil between the extremes of clay and sand, enriched by a compost of old manure and leaf mold, peat moss, vermiculite or peat humus, is adapted to the generality of flowering plants. Previous to planting flower beds or borders care must be taken that they are so arranged that the ground is a little elevated in the middle, allowing the water to run off, this also shows off the plants to better advantage.

DRAINAGE FOR FLOWER BEDS

Almost all flowers thrive best in well drained beds that do not hold excess moisture to sour the plant roots. Dig out the beds 18 to 30 inches deep to penetrate the subsoil so water can pass quickly through after heavy rains. Fill in with rich mellow loamy soil, manure, vermiculite and peat moss as this retains the right amount of moisture for the plants' needs, even during drought.

DIRECTIONS ON PACKAGES

Planting directions are on each packet of seeds we send you. Most flowers are easy to grow if these simple directions are used.

PLANTING FLOWER SEED

Make the surface as fine and smooth as possible. Cover each kind of seed to a depth proportionate to its size; very small seeds, like petunias, should be merely sprinkled on the surface of the ground, and barely covered with shredded sphagnum moss; press the soil down firmly over the seeds with a brick or a short piece of board. For larger seeds the depth should be regulated according to the size of the seeds, those the size of a pinhead

1/4 inch deep, and those the size of a pea, 3/4 of an inch or more. Get a piece of lath (an ordinary household yardstick works fine) about 2-3 feet long, press the edge down into the soil evenly, so as to make a groove as deep as the seed is to be planted, scatter the seed along this, allowing 4 or 5 of the larger to 15 or 20 of the smaller seeds to the space one plant is to occupy when grown. Cover the seeds by pressing; turn your lath flat-wise and press the soil down firmly. In light, sandy soils flower seeds should be covered twice the depth that they should be in stiff or heavy clay soils. Cover all seed beds lightly with shredded sphagnum moss to get good results.

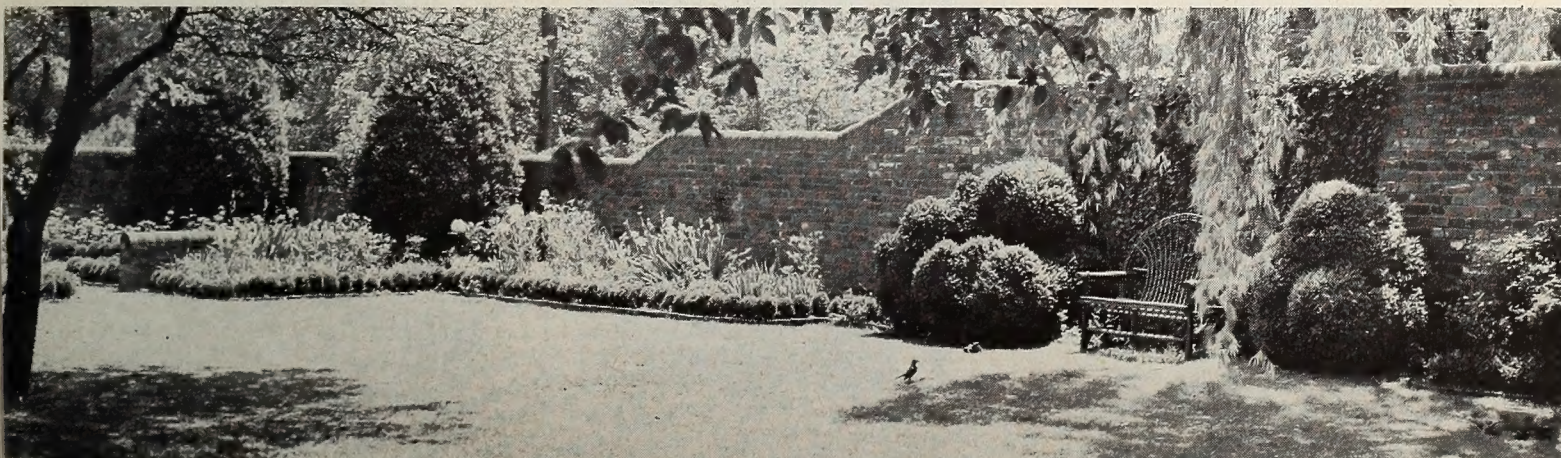

SOWING FLOWER SEED IN BOXES

Many flowers will stand transplanting. Many of them grow better for having been transplanted. In sections liable to late spring frosts or where drought comes in spring, it is advisable to sow seeds in shallow boxes which can be placed in a warm, sunny window or on a porch. This is always advisable with the expensive seeds and those of a tropical nature, such as coleus, salvia, etc. These need a warm soil to start the seeds. Sow the same as in open ground, and keep the soil moist, but not soaking wet. If surface of soil shows tendency to cake or crust sprinkle shredded sphagnum moss lightly over the surface. Small seeds cannot force their way through a crusted surface. As soon as plants reach a height of 2 to 3 inches they may be transplanted, taking as much earth as possible with each plant, so as not to disturb the roots more than necessary.

FLOWER VARIETIES

Most kinds of flowers are represented by several varieties. They may not only be different in color but may also be of different types, shapes or heights. Note these differences, in our descriptions, so to order varieties best suited to your garden. STRAINS are frequently mentioned. After a new variety is introduced, good seed growers select ideal plants for seed stocks. These develop ideal or improved strains. Each year should show some further improvement; more true, more ideal, stronger, healthier plants and more or better flowers. Extra care, pulling out all off-type plants, experienced help in every seed growing operation, make the finest strains much more beautiful and satisfactory than common field-run seeds. Naturally you get the finest strains from Hastings of Atlanta. Remember, cheap seeds may sprout but best seeds produce best crops—or flowers.

HASTINGS' ACCLIMATED DAHLIAS

In keeping with our policy of offering only the very best seeds, plants, and bulbs we offer these really outstanding Southern grown Dahlias.

Abbreviations and Symbols

The lettering following variety names relates to the type and size. The first letter—A means large size over 8 inches in diameter. B—Medium, 4 to 8 in. M—Small, miniature, under 4 in. BB—4 to 6 inches.

The next letters refer to type: Ba—ball. FD—Formal Decorative. IC—Incurved cactus. ID—Informal decorative. STC—Straight cactus. SC—Semi-cactus, etc.

DAHLIA CULTURE—Plant Dahlias only in fairly rich but exceptionally well drained soil so there will be no excess moisture accumulation to sour the tubers. Cover the tubers 6 inches and space them from 2 to 4 feet apart according to the type growth of the variety. Keep growing steadily with good garden fertilizer (high in Potash). Force largest exhibition blooms with lots of water when buds form. Early plantings make best bedding effects. Plant very late for prize blooms to come in autumn. Cut tops at ground level, after frost, and mulch heavily to protect clumps from winter freezing. Lift in late spring to divide and replant.

Cannas Make Borders or Beds

NOW A 3-ROW CANNA BED FOR ONLY \$2.95

Will Bloom All Summer

(C1/10) 3-ROW CANNA BED. 1 root for center plant and 6 in next row of red, then 12 roots of best yellow for outer row. 19 roots in all. Postpaid—\$2.95.

Huge 4-Row Bed—Only \$4.95

(C2/10) 4-ROW CANNA BED—\$4.95. 19 roots of red, for center plant and next 2 rows, and 18 yellow for outer row. 37 roots in all. Postpaid—\$4.95.

CANNA CULTURE—Cannas thrive best in full sun, prefer good drainage but a very rich soil well supplied with thoroughly rotted compost and lots of moisture as soon as they are well started. Set roots 3 inches deep and 12-18 inches apart for a good display to last all summer until frost. When frost has burned the tops they may be cut off close to the ground level and mulched heavily with pine straw or similar material to protect the roots from freezing which will destroy them. In colder areas it is best to dig the roots after first frosts, keeping them in natural clumps, with soil attached, in a frost free storage cellar.

(3030/10) TUBEROUS ROOTED BEGONIAS

5 lbs., \$1.75; 10 lbs. \$3.00

538/10 FESCUE, KENTUCKY 31

Deep-rooted perennial grass with shiny, smooth, broad, slightly barbed leaves. Grows well on wet, poorly drained land, yet produces equally well on dry upland soils. Has but a very short dormant period, for once established is drought resistant. Ideal for airfields, athletic fields, playgrounds and home lawns. Plant only in the fall (Sept. to Dec.). Seeding rate, 5 lbs. per 1,000 sq. ft. **Lb., 45c. 5 Lbs., \$1.75. 10 Lbs., \$3.00. Write for low quantity prices.**

540/10 FESCUE, CREEPING RED

Produces turf similar to Chewings Fescue, but spreads by underground runners that make an extremely tight, uniform sod. Leaves are fine, needle-like, of deep green color. Thrives on all types of soil. Excellent for shady places, and withstands wear. Good for home grounds, golf courses, airports, cemeteries and playgrounds. Sow in spring or fall. Seeding rate, 3 lbs. per 1,000 sq. ft. **Lb., 80c. 5 Lbs., \$3.50. 10 Lbs., \$6.50. Write for low quantity prices.**

509/10 White Dutch Clover

Not a grass, but is used extensively to supplement various lawn grasses in making the heaviest green turf to stand rough treatment and to last several years. Thrives on poor soils where grasses will not grow well, and withstands drought. Good for sun or shade. Not recommended for planting with Bermuda, Zoysia grasses or play areas. It is not included in our grass seed mixtures. Seed in spring or fall. Seeding rate, 2 lbs. per 1,000 sq. ft. **Lb., 90c. 5 Lbs., \$4.00. 10 Lbs., \$7.50.**

GRASSES FROM ROOTS—SOD

ZOYSIA GRASSES

These prices below are postpaid

Forms a very thick, dense sod of fine textured turf. Once established, it requires but average care, and chokes out weedy growth. Grand for full sun to fairly heavy shade. It requires a full season from sprigging or plugging to cover well. Good care is also needed to get it well established. For detailed instructions on planting, write for our special Zoysia Bulletin. Plant anytime except when freezing. Available only in sod. 1 sq. yd. plants about 400 sq. ft. of area.

T5/10 ZOYSIA MATRELLA (Manila Grass). Most widely planted Zoysia, originally distributed here in the South. **1 square yard, \$5.45. 5 yards or over @ \$5.35 per yard. Delivered.**

T10/10 MEYER (Z-52) ZOYSIA. New U. S. D. A. development, more vigorous, harder, tougher and generally more successful than above. Well worth the difference. **1 square yard, \$9.25. 5 yds. @ \$8.95 per yd. Delivered.**

T15/10 NEW HYBRID EMERALD ZOYSIA. Newest and best of all Zoysias. Vigorous growing hybrid that spreads rapidly in well prepared, highly fertilized soil, to make a fine bladed, "luscious" dream lawn! **Emerald Zoysia (genuine stock). 1 sq. yd., \$9.25. 5 yds. @ \$8.95 per yard. Delivered.**

These prices below are postpaid

T20/10 BERMUDA, TIFTON 57 (TIFLAWN). A very new low growing strain much finer in texture than ordinary bermuda. Requires less mowing and makes thick turf. Plant in late spring through summer. **1 sq. yard, \$5.95 (to plant about 4-500 sq. ft.). 5 yds. @ \$5.75 per sq. yd. Delivered.**

T25/10 BERMUDA, TIFTON 127, (TIFFINE). Very tiny bladed bermuda making densest turf imaginable staying beautifully green all summer with very little mowing. (Set sprigs 6 to 12 inches apart). **One square yard (to plant about 4-500 sq. ft.) \$5.95. 5 yds. @ \$5.75 per sq. yd. Delivered.**

T26/10 BERMUDA TIFGREEN. Newest and finest textured of the hybrid Bermudas for special plantings and golf greens. **1 sq. yd. (to plant 4-500 sq. ft.) \$5.95. 5 yds. @ \$5.75 per sq. yd. Delivered.**

T30/10 CENTIPEDE GRASS. The popular grass for poor, dry soils in the middle and lower South. Good for full sun to semi-shade. Very flat growing, medium coarse texture grass that requires little mowing. Plant in late spring and summer only. **600 sprig bag (to plant 3-400 sq. ft.) \$6.45. 5 bags (to plant 1500-2000 sq. ft.) for \$32.00. Delivered.**

T35/10 ST. AUGUSTINE GRASS (BITTER BLUE-STEM). Stands the heaviest shade to full sunny areas. Coarse, broad leaves, but makes a very pleasing, thick, dense turf that crowds out weeds. Hardy as far north as Birmingham, Atlanta, Greenville, etc. Needs rich soil and ample moisture. Can be grown as an evergreen grass in the lower South with frequent feedings throughout the year. Topdress twice a year for best results. Plant only in the spring and summer. **600 sprig bag (to plant 3-400 sq. ft.) \$6.45. 5 bags (to plant 1500-2000 sq. ft.) for \$32.00. Delivered.**

549/10 ZOYSIA JAPONICA (Seed)

A coarser textured strain than the popular Zoysia matrella which is sold only in sod form. Write for special circular for detailed seeding instructions. Plant only in the spring. Seeding rate, 2 lbs. per 1,000 sq. ft. **Postpaid. 1/4 Lb., \$1.00. Lb., \$3.00.**

533/10 KENTUCKY BLUE GRASS

One of the most popular lawn grasses for the middle and upper South, thriving in sunny to semi-shaded areas. Leaves a pleasing dark green color and fine texture. One of the main perennial grasses, growing best in well-prepared, limed soils. Has a tendency to become dormant in hot, dry summers in the middle South. Frequent watering, though, brings back good fall color. Requires about 2 years to become well established, and is a slow germinator. Used most as a basic grass in seed mixtures. Plant in spring or fall. Seeding 5 lbs. per 1,000 sq. ft. **Lb., 90c. 5 Lbs., \$4.00. 10 Lbs., \$7.50.**

544/10 MERION KY. BLUE GRASS

Newest Sensation

The brand new, sensational grass that is being featured in national garden magazines as the "Answer to the gardener's prayer" for an ideal lawn grass. Forms a dense, dark green turf that experts say chokes out crabgrass, is resistant to Helminthosporium leaf spot, tolerates closer mowing than common Blue Grass, is considerably more resistant to heat and drought, and establishes itself more quickly than common Blue Grass. Plant in spring or fall. Seeding rate, 2 lbs. per 1,000 sq. ft. **Lb., \$2.25. 5 Lbs., \$11.00.**

539/10 POA TRIVIALIS

(Shady Blue Grass)

Leaves narrow, soft and glossy. Has a creeping habit. Often called the Blue Grass of the Shade, and is particularly adapted for heavily shaded area. Lime soils to produce a good permanent cover. Needs good moisture. Plant in spring or fall. Seeding rate, 3 lbs. per 1,000 sq. ft. **Lb., 80c. 5 Lbs., \$3.50. 10 Lbs., \$6.50.**

553/10 CARPET GRASS

Lb., \$1.00. 5 Lbs., \$4.50. 10 Lbs., \$8.00.

532/10 RYE GRASS, WINTER

Use for temporary plantings of winter lawns to provide a luxuriant green turf, or for over-planting over Bermuda and other winter-dormant grasses. Plant at any time. Seeding rate, 10 lbs. per 1,000 sq. ft. **5 Lbs., 80c. 10 Lbs., \$1.50. Write for low quantity prices. Be sure to add delivery charges.**

557/10 RYE GRASS, PERENNIAL

Hastings' Experience Knows Southern Lawn Needs

Let us help you

LAWN PLANTING AND CULTURE

PREPARE SOIL WELL FOR SEED OR SOD

Prepare soil 8 inches or deeper. Remove rocks, roots and litter.

For most soils, additional amounts of humus will be needed to make them mellow and more moisture absorbent. Add at least 1 bale of peatmoss per 1,000 sq. ft. to sandy or clay soils. Work in well before applying fertilizers. Apply 100 lbs. ground limestone, 100 lbs. of Pulverized Sheep Manure and 50 lbs. Hastings' Lawn Fertilizer to each 1,000 sq. ft. (50x20). Rake in thoroughly, mixing fertilizer with soil and working the surface and level. Soak ground thoroughly. Let soil settle a few days to a week before planting.

SEEDING OR SODDING THE LAWN

Most grasses, except Hulled Bermuda, Merion Blue Grass and Ryegrass, are seeded at the rate of 5 lbs. per 1,000 sq. ft. Double the amount for Ryegrass. For special seeding rates of individual grasses, see lists on page 10. Broadcast seeds evenly by hand or with the use of a seeder. For hand application, divide amount for a given area in half. Broadcast first half as you walk across lawn in a lengthwise direction. Broadcast other half in a crosswise direction. Firm with roller or drag lightly and smoothly with back of rake, and water thoroughly.

Set plugs of Bermuda, Centipede, Zoysia or St. Augustine grasses 12 inches apart each way, or sprigs in narrow rows, stepping on each planting to firm it. Water thoroughly afterwards.

LAWN MAINTENANCE IS VERY IMPORTANT

Always keep newly seeded lawns well watered to insure good germination and quick rooting. Make first mowing when new grass is 3 inches high. Subsequent mowings are made as growth conditions permit. Set mower to cut full 2 inches high. (More good lawns are ruined by close mowing than all other causes!) On established lawns, keep down weeds by spraying with a 2, 4-D weed killer, and Crabgrass with Dupont Crabgrass Killer. Feed lawns in March, September and December with 25 lbs. Hastings' Lawn Fertilizer (50 lb. bags, \$3.50 each. 250 lbs., \$17.25. F.O.B. Atlanta) per 1,000 sq. ft. In dry weather, water lawns thoroughly with a rotary or oscillating sprinkler, soaking ground to a depth of 4 inches or more. Hastings' Lawn Fertilizer actually costs less because it goes twice as far. (See page 68.)

531/10 BERMUDA, HULLED (Extra Fancy Grade)

Most valuable grass for Southern sunny lawns. Stands drought and scorching summer sun better than any other variety, has a creeping, spreading habit, stands roughest use, and is indispensable for full sunny locations. Ideal for all sections of the South—for sandy soils to clay soils. For best results, topdress twice a year (April and August) with 25 lbs. Hastings' Lawn Fertilizer per 1,000 sq. ft. Our Hulled Bermuda grass sprouts in a week when soil is moist. Seed at the rate of 2 lbs. per 1,000 sq. ft. Bermuda seed will not germinate in cool or cold soils.

550/10 HASTINGS' EVERGREEN LAWN GRASS

Obtained only direct from Hastings.

DUPONT ARASAN TREATED

An extremely popular lawn grass mixture for the upper South, for full sun to semi-shaded areas. It grows off quickly, has a rich green color, fine texture, is slightly creeping, smooth and velvety. It really makes a luxuriant green carpet, and years of experience have proven it to be one of the best of all lawn mixtures for spring and fall plantings. Our own special formula mixture. You can get it only direct from Hastings. Seeding rate, 5 lbs. per 1,000 sq. ft.

Do not mow at any time less than two (2) full inches!

Lb., \$1.00. 5 Lbs., \$4.50. 10 Lbs., \$8.50. Add Shipping Charges.

555/10 HASTINGS' SHADY LAWN GRASS

Obtained only direct from Hastings.

DUPONT ARASAN TREATED

For shady places in the upper half of the Cotton Belt, and farther north. It makes a wonderful winter and spring grass carpet, and stands hot summers in shady places better than most other grasses. Although this mixture is shade tolerant, areas planted closely under large trees must be given more frequent feedings and waterings to offset competition of tree roots. Plant in fall or early spring. Seed at rate of 5 lbs. per 1,000 sq. ft.

Do not mow at any time less than two (2) full inches!

Lb., \$1.05. 5 Lbs., \$4.75. 10 Lbs., \$9.00. Add Shipping Charges.

551/10 HASTINGS' ALL-PERENNIAL LAWN GRASS

Obtained only direct from Hastings.

Formulation by South's Finest Lawn Experts

DUPONT ARASAN TREATED

Our newest and choicest grass seed mixture of **all-perennial** grasses for permanent lawns of high quality. No cheap annual or short-lived nurse grasses such as rye grass, timothy or red top are used in this mixture. Ideal for use in the upper South where cool season grasses thrive. Provides a smooth, velvety turf of pleasing texture. Fine for sun or semi-shade. For best results, lime soil prior to seeding to provide a near-neutral soil reaction and apply humus for aeration. Seed at rate of 5 lbs. per 1,000 sq. ft.

Do not mow at any time less than two (2) full inches!

Lb., \$1.15. 5 Lbs., \$5.25. 10 Lbs., \$10.00. Add Shipping Charges

552/10 HASTINGS' COASTAL PLAIN LAWN GRASS

Obtained only direct from Hastings.

DUPONT ARASAN TREATED

A brand new combination of lawn grasses proven to withstand long, hot, wet or dry days of the unusually long growing seasons of the lower South including the Atlantic and Gulf Coastal areas and Florida. Suited to sandy or heavy soils in sun or part shade, with good fertilization. Lb., 85c. 5 Lbs., \$3.75. 10 Lbs., \$7.00. Add Shipping Charges.

BY MAIL—PLEASE ADD SHIPPING CHARGES

To make these lowest quotations to you we have figured strictly on f.o.b. Atlanta rates. For one pound of seed of grass or clover **you must add 25c extra** for postage and packing. ARRANGE FLOWERS THE EASY WAY - MAKE LOVELY CORSAGES!

(Please note appropriate books on page 71)

(Please add mailing charges of 25c per order)

A flower arrangement may be a very gorgeous and complicated affair or it may be very lovely, yet, so simple that even a very inexperienced beginner can assemble a few flowers, some foliage and perhaps some seed pods and create a thing of beauty to brighten the home into a gayer and happier place. On page 71 you will find listed some of the finest books, including "Design in Flower Arrangement" by John Taylor Arms, and which give the fundamental principles of this lovely and creative art. On this page are offered some of the more important accessories to flower arrangement and which makes the "mechanics" much easier. We can list only a part of our large supplies carried in our stores in Atlanta, Birmingham, Chattanooga and Charlotte, so most cordially invite a visit and inspection at such time as convenient to you. Meanwhile we offer these items for mail shipment or telephone orders.

The largest selection of accessories is carried at **Hastings' New Garden Shopping Center**, 2350 Cheshire Bridge Rd., N. E. (Buford Highway), Atlanta, and we most cordially invite you to visit us there if you can. More limited but basic selections are carried in all our other stores and we will be glad to mail to our out of town customers almost any selection. (Please add mailing charges of 25c per order.)

"SNAP" (Antirrhinum) CULTURE

HHP treat as **HA**. These new Snapdragons far surpass anything yet introduced, both for magnificent size and in height. 2-3 ft. Sow very early in boxes or frames, transplanting in sunny position outside when soil is warm. Give loamy, well-drained soil and plenty of water; set plants 1 ft. apart. Mulch lightly with vermiculite to keep soil from baking and crusting. Give supplemental feeding with concentrated **RAPID-GRO** fertilizer — (Lb., \$1.25. Add 25c for shipping) to insure really giant size flowers on the tallest spikes and with the richest color tones. Later plantings are made directly in well prepared beds. Snapdragons may be planted late for a wonderful fall crop, starting seed in cool beds in midsummer and handling as above with plenty of water when weather is dry.

CULTURE: Plant early for best flowers over longest season of bloom. Plant in rows. Stake late Spencers or run vines on wires. For long flowering, dig rows out 12 inches deep, fill in 6 inches with well-rotted manure and soil mixed, drop seeds after they have been inoculated, and cover 2 to 3 inches, gradually filling trench as growth starts. To grow the largest flowers, plant early in good soil worked deep, run rows north and south if possible, and thin plants to 6 inches apart. Water thoroughly when needed. Culture on each package. One ounce plants 50 feet of garden row.

HASTINGS' PROLIFIC CORN

Makes the Best Flavored White Corn Meal . . . Get Originator's Stock for Your 1958 Seed Patch

STRICTLY OPEN POLLENATED SEED STOCK

**WE CHALLENGE YOU TO TRY CORN MEAL
MADE FROM HASTINGS' PROLIFIC CORN!**

With the extra sweetness and delicious flavor that you get from slow ground, fine meal made from genuine Hastings' Prolific Corn, we believe that you will never again be without it. If you have had to put up with gritty meal from hard corns or "gummy" meal from soft varieties and hybrids it's time you were trying at least a small patch for your own table meal. A peck will be sufficient and we know you will like it so well that you'll plant it every year for the most delicious corn bread, muffins, "hush puppies," hoe cake, or "pone" or spoon bread you and your family have ever had!

PLANT A PURE SEED AND MEAL PATCH EVERY YEAR

Many of our farm friends purchase a peck or a bushel (to plant 2 to 10 acres) every year and then save this seed to plant their full acreage the following year. Thus, they have a small seed field growing each year with seed from us and their big crop is planted always with seed "one year from breeder," raised at home to save money!

PRICES OF (140/10) HASTINGS' PROLIFIC WHITE CORN

1/4 Lb., 20c. (By mail 10c extra.) 1 Lb. 35c. (By mail 25c extra.)
2 Lbs., 65c. (By mail 35c extra.) 5 Lbs., \$1.50. (By mail 50c extra.)
14 Lbs. (Peck), \$2.15. 56 Lbs. (Bushel), \$6.50. F.O.B. Atlanta. (By mail see postage schedule in back of catalog.)

TRY HASTINGS' YELLOW PROLIFIC CORN

*Grow Corn — Not Just Cobs!
(Superb for Roasting Ears)*

Big eared corn looks good and are very bulky until shelling time comes, when we readily see such a small proportion of grain to cob. Hastings' Prolific, both white and yellow, have a very tiny cob such that the shelling percentage of top quality grain is unusually high. Plant a seed patch this year!

SEED COSTS LESS THAN A DOLLAR AN ACRE

in buying Hastings' Yellow Prolific by the bushel. No crop you can grow costs so little per acre for the very finest seed available and proven in experiment station reports from all Southern states.

(143/10) HASTINGS' YELLOW PROLIFIC PRICES

For the 1958 season Hastings' Yellow Prolific will be sold F.O.B. Atlanta (add postage for mail shipment) in sealed peck (14 Lbs.) bags at \$2.25 (enough for 2 to 4 acres) and in sealed bushel (56 Lbs.) bags at \$6.65 each. 1/4 Lb., 20c. (By mail 10c extra.) 1 Lb., 35c. (By mail 25c extra.) 2 Lbs., 65c. (By mail 35c extra.) 5 Lbs., \$1.50. (By mail 50c extra.) (Superb for "roasting ears.")

CHINESE CHESTNUTS for EXTRA CASH

Blight Resistant Chinese Chestnuts—The South's Newest Cash Crop

Plant early for thrifty growth! Harvest crops within 3 to 4 years—more and more as the trees develop. Successful everywhere that peaches or apples will grow! Plant 3 or more trees for cross pollination.

Sweet, delicious, meaty nuts sell on sight and are even larger and sweeter than native chestnuts which have now all but completely disappeared because of blight.

Commercial groves are producing heavy crops every year at good profits. Plant 27 trees per acre set 40 feet apart each way utilizing open spaces for summer and winter soil-building legumes until trees are too large.

Hastings' Luscious Strawberries

PLANT, PRUNE, SPRAY RIGHT FOR FINE FRUITS AND FLOWERS. HASTINGS IS HEADQUARTERS FOR MATERIALS—See Pages 64-65.

APPLES AND PEARS. Planting and Pruning. Set trees 40 ft. apart. Plant young trees with strong roots. Select 3 buds or small branches a foot apart around trunk, lowest bud at height desired for lowest limb. Other buds and top or tip are cut out with sharp knife. If other branches develop, cut them off the following spring. As desired branches develop after the first year, select buds to retain as on the whip, pointing in different directions for balance. Keep other branches off by pruning close to limb or trunk. Besides, prune out all dead, diseased, weak branches and any which would interfere with more desirable branches each spring.

Spraying. For home orchards 4 or 5 sprays are needed each year to prevent fungus and insect infestations as follows. 1. Dormant spray. This delayed spray is made when fruit buds become silvery colored and before young leaves develop. Use Lime-Sulphur with addition of Malathion, as directed on packages, against scales, scab, red mite and aphids. 2. Pink bud spray. Use when fruit buds show pink color, DuPont Spray against scab, codling moth, worms, and caterpillars. 3. Calyx spray. Use when petals drop and before calyx closes. DuPont Spray as on package directions. 4. Use same spray 10 days later. 5. Same spray 15 days later. If only 2 sprays are made a year, use numbers 1 and 3 as most important.

CHERRIES, PEACHES AND PLUMS. Planting and Pruning. Plant young trees 25 ft. apart and prune to 3 or 4 chosen buds or branches 8 to 12 inches apart on trunk and pointing in different directions to make balanced tree. Prune back the main stem above chosen top bud or branch. The second year, before buds swell, cut off all shoots not needed for the tree's framework, keeping tree rather low and open in center. After bearing begins, cut back new shoots in midwinter at least half way.

Spraying. The general program is 4 sprayings. 1. In winter use a strong Lime-Sulphur spray according to package instructions against leaf-curl and San Jose scale. 2. After petals drop and husks split from young fruits, use DuPont Spray against scab, brown rot and curculio. 3. Repeat his spray 15 days later. 4. Use DuPont Spray 5 to 20 days later against scab and brown rot. Borers may infest trunks at or beneath the soil surface. Examine for injury in June and September. Dig borers out with knife and wire. Use Para-

THE BEST PRUNING SHEARS

Only the strongest, heaviest, well-tempered steel is worth having in pruning shears. Shears that "cut" instead of "chew" are necessary for a good job. We have such shears to last for years, which will not pinch your hand. **No. 808/10. Pruning Shears. Post-paid, \$4.29.**

Scalecide around trunks of older trees about October 1st, as directed on package.

Keep fruit trees cultivated, pruned, sprayed and well fertilized and your rewards will be abundant.

BERRIES. Set 3 to 4 ft. apart. Blackberries and Dewberries should be pruned. Pinch off tips when about 3 feet tall to develop low branches. After fruiting, cut out old stems as they are through bearing and will die anyway. Pull up between-row suckers to prevent spreading out of control. If underside of leaves develop a bright orange rust, pull up plants and burn them. Burn any canes infested with borers. Spray with DuPont Fruit Tree Spray in summer and with Bordeaux Mixture in winter as rust preventative.

Raspberries are pruned as for Blackberries. In early spring remove dead and weak canes and shorten long new canes, leaving 3 to 5 strong canes per plant to fruit each year. Main diseases, as with Blackberries, are yellows, anthracnose, orange-rust and cane-blight. Remove and burn diseased plants, as also for cane and root borers. Spray as above.

STRAWBERRIES. Planting. Space plants 12 inches apart on raised, heavily manured beds. Set with crown just above soil level, packing roots firmly. Soak thoroughly at planting. Pine straw is excellent mulch, protecting from cold and drought. Prune back runners to encourage best crops. Spray with Bordeaux Mixture for leaf spot and Malathion for insects.

GRAPES. (Vine and Bunch types.) Set Bunch grapes 8 ft. apart and Vine or Muscadine type 15 ft. apart. Fencing is recommended. Never cut in summer. Only prune while dormant, preferably in December. Very long, overgrown canes are usually

sterile so cut them off at their bases. Reduce length and number of normal shoots, thickness of a pencil which will bear the next summer. Start training after second year, selecting 2, 4 or 6 canes from main stem in pairs to train horizontally, each cane restricted to bear 6 to 10 buds, according to its strength. Each bud should average 2 grape clusters.

Spraying. Black-rot is the worst disease and spraying for that usually controls most other diseases and insects. Plow under rotted fruit in early spring. Spray 4 or 5 times with Bordeaux Mixture—first when new growth is starting, second when new growth is about 10 inches long, third after blossoms drop, fourth 10 days later, and fifth 15 days later. Second and third sprayings should have added Malathion to control insects.

GARDENIAS-CAMELLIAS and other broadleaf evergreens. Pruning may be done generally after blooming or as needed to keep desired size and shape. **Spraying.** Florida Volck sprayed as needed for white fly and scale using care never to apply in very hot or very cold weather.

FLOWERING SHRUBS, FLOWERS. Pruning. After blooming is proper time to prune spring bloomers except disbudding when desired for improved flowering habits. Summer bloomers are pruned rather severely in late winter to force new growth, the source of the new flowers. **Spraying.** Spray or dust with DuPont Floral Dust to control pests when necessary.

BOXWOOD. Prune as necessary to retain correct size and shape.

Spraying. Use 25% DDT in oil in spring to control box leaf minor. Dust with sulphur in cool weather in summer or spray with MALATHION to control red spider (mites).

ROSES. Planting and Pruning. Set bush roses 24 to 30 inches apart, climbers 6 to 10 feet as desired. Dig beds 30 inches deep, mixing abundance of rotted manure or rotted humus to hold moisture. Plant when weather is still cold. When buds swell noticeably in spring, bush roses are cut back 1/3 to 2/3 normal growth and all dead and diseased canes entirely. Later pruning is for training to desired size. Spring flowering climbers (HW) are pruned only after blooming is over, cutting back 1/3-1/2 normal growth or train to desired area and all dead and diseased canes. C.H.T. roses are pruned similarly to bush roses.

Spraying. Weekly spraying or dusting with DuPont Rose Dust gives ample protection against black spot, mildew anthracnose, etc.

BUSH SNAP BEANS

CONTAINS VITAMINS A AND B1

CULTURE—Plant beans in the middle South from March to September. Continuous plantings may be grown through the entire summer. Sow in drills 1½ to 2 feet apart, dropping a bean every 4 in. and cover 1 in. Soil should be warm and moist for good germination. Cultivate often and shallowly until vines blossom; then stop so roots will not be injured. Pods picked as they ripen keeps them bearing a long time. **Dust with Rotenone.** ½ Lb. of seed plants 50 ft. row of bush beans, or 100 ft. row of pole beans.

1957 All America Selection

33/10 GREEN CROP BUSH SNAPBEAN

32/10 Hastings' BUSH CORNFIELD

The tenderness and flavor of Southern cornfield beans is famous everywhere. Now with a genuine **BUSH CORNFIELD** we may have this delicious flavor but so much earlier than ever before because it is a bush instead of pole. Rich green, thick, very meaty, tender, pods of ideal length and with barely string enough to make preparation easy, this we consider one of the very finest additions to our Southern bean listing. Seeds large, red striped on buff. Plant in very wide corn row middles at last cultivation. Supply extremely limited. **Introductory quarter pound packages 35c each. ½ Lb., 60c. Lb., 95c. Postpaid. Obtainable only from Hastings.**

14/10 HASTINGS' STRINGLESS WONDER

WE GUARANTEE YOU'LL LIKE THIS POLE BEAN OR YOUR MONEY BACK

70 days. Cornfield and garden type. Another Hastings introduction that brings stringless, delicious quality to the superb flavor so characteristic of pole beans. This new development was tested in all sections of the South and in every instance proved sensational. It picks easily, for use fresh. It is really a "knock-out" for canning, holding the same superb tenderness and flavor upon opening and serving even weeks or months later. The vines are vigorous, thriving until frost when kept picked clean, frequently cultivated, and dusted against beetles. The pods are long, almost straight, round, very sweet and delicious in flavor and absolutely stringless at all stages of growth. We recommend it unreservedly.

CABBAGE

CULTURE—Sow seed in drills 6 inches apart across the bed, dropping the seed 5 to 6 to the inch. Firm the soil after covering and then water the bed thoroughly. Keep beds moist but not soaking wet. Seed germinates in 3 to 8 days, according to weather. Keep young plants growing steadily from the start. When plants have made the fourth pair of leaves transplant to open ground. 1 Oz. of seed usually makes at least 1,000 good strong plants. Sow 1/4 to 1/2 Lb. for plants to set one acre. Use **Sabadilla Dust** for control of worms (see page 64).

FROST PROOF CABBAGE PLANTS FOR SPRING PLANTING

CUCUMBERS *Sliced Fresh or as Pickles*

(180/20) Hastings' White Spine
To Market or to the Table

CUCUMBER CULTURE—Plant in warm loamy soil in hills 4 ft. apart each way. Drop 8 or 9 seed to each hill, thinning to 3-4 strongest plants. Keep cleanly cultivated until vines run and begin to bloom. Keep "cukes" picked and vines will continue to bear much longer.

(185/20) MODEL PICKLE CUCUMBER (New Introduction)

For Pickling or Slicing

56 days. White Spine. 6 inches. The new sensation of the pickle trade because of its tremendous productivity of very uniform fruits over a long bearing season. Rich deep green and quite good for slicing as well. A real double use variety. Excellent for the home garden.

Pkt., 15c Oz., 35c. 1/4 Lb., 85c. Lb., \$2.50. 5 Lbs., \$11.25. Postpaid.

(176/20) STAYS GREEN CUCUMBER

58 days. White Spine. Really a good variety. Medium sized, glossy dark green, white spine cucumber; 7 to 8 inches long, cylinder shaped variety. Is popular with shippers and a good home garden sort because it retains its fine color a very long time. Young fruit is well adapted for pickling and mature fruit is remarkably well adapted in shape and size for packing and shipment. Pkt., 10c. Oz., 25c. 1/4 Lb., 75c. Lb., \$2.25. Postpaid.

172/20 NEW SMOOTHIE CUCUMBER (1957 WINNER)

ALL-AMERICA SELECTION 1957 All-America Winner. A North Carolina origination with darkest green cukes and absolutely smooth at all stages of growth. A great garden novelty! Be the first to grow it in your county. Pkt., 25c. 5 for \$1.00. Postpaid.

(173/20) A & C CUCUMBER (MARKET STRAIN)

63 days. White Spine. Vigorous grower, resistant to disease and making an abundance of deep green, uniform slender cukes. 9 to 10 inches long. Pkt., 15c. Oz., 30c. 1/4 Lb., 80c. Lb., \$2.35. Postpaid.

(184/20) CUBIT CUCUMBER—All-America Winner

ALL-AMERICA SELECTION 64 days. White Spine. Deep, rich green color and prolific bearing habits, we recommend this fine 9-inch white spine cucumber to all Southern gardeners. Its cool, dark green color holds up unusually well for local or distant markets, and its crisp freshness is preferred everywhere. Packets, 15c. Oz., 40c. 1/4 Lb., 90c. Lb., \$2.75. Postpaid.

(175/20) EARLY FORTUNE CUCUMBER

62 days. White Spine. Of dark green color which it holds for many days after picking. Of very regular form and growth, tapering in shape. Pkt., 15c. Oz., 35c. 1/4 Lb., 85c. Lb., \$2.35. Postpaid.

(179/20) MARKETER CUCUMBER

ALL-AMERICA SELECTION 65 days. White Spine. Appropriately named because of its uniformity in size, 8-9 inch length, and beautiful green color. Marketer is immensely productive and slices with perfect crispness. Pkt., 15c. Oz., 40c. 1/4 Lb., 90c. Lb., \$2.75. Postpaid.

(182/20) STRAIGHT 8 CUCUMBER

ALL-AMERICA SELECTION 62 days. White Spine. Symmetrical, almost cylindrical new variety. Rounded at ends, ideal in dark green coloring without lighter stripes found in most sorts. Uniformly eight inches by two at ideal stage. Pkt., 15c. Oz., 35c. 1/4 Lb., 85c. Lb., \$2.50. Postpaid.

(178/20) EARLY GREEN CLUSTER CUCUMBER

54 days. Black Spine. A standard well-known variety for both slicing and pickling. Very prolific, uniform size, smooth skin and one of the very earliest of all varieties to grow in the garden. Pkt., 15c. Oz., 35c. 1/4 Lb., 85c. Lb., \$2.35.

180/20 HASTINGS' WHITE SPINE (Dark Green)

62 days. White Spine. (Extra dark green strain.) It is good for shipping, good for nearby markets, good for home use, good for pickles when picked small. It holds its intense green color better and stays in good eating condition longer than the others. When full grown is 8 to 9 by 2 1/2 inches. Ready for use in about 58 days. It is an extra early sort, crisp and tender, holding its fresh dark green appearance long after being gathered. In our opinion this is the best all-purpose cucumber you can plant.

Pkt., 10c. Oz., 25c. 1/4 Lb., 80c. Lb., \$2.35. 5 Lbs., \$10.00. Postpaid.

(186/20) EVERBEARING PROLIFIC CUCUMBER

New Strain for Slicing or Pickling

54 Days. White Spine. Entirely distinct on account of its close bushy growth and everbearing character. The first cucumbers come early and vines continue to bloom and produce until late in the season. A single vine will show at one time cucumbers in every age of growth. Of perfect shape, small sizes are fine for pickling, the larger ones for slicing. A most popular home garden and pickle variety.

Pkt., 15c. Oz., 35c. 1/4 Lb., 85c. Lb., \$2.35. Postpaid.

(177/20) CLARK'S SPECIAL CUCUMBER

Best for Slicing—Dark Green

60 days. White Spine. This new variety was selected as probably the finest dark green, white spine cucumber and good for all purposes. Main crop variety, holding its color and firmness in distance shipping and on account of its small seed pocket is excellent for slicing. Its quality is excellent. Attractive deep green, uniform in length. 8 to 9 in., very smooth in appearance and with few white spines.

Pkt., 15c. Oz., 35c. 1/4 Lb., 85c. Lb., \$2.35. 5 Lbs., \$10.00. Postpaid.

(181/20) IMPROVED LONG GREEN CUCUMBER

Best for Home Garden Planting

70 days. White Spine. A standard for slicing or pickling. Extremely prolific, medium late, very hardy and most disease-resistant variety. Ends taper slightly and it is slightly warted. Small pickles are well shaped.

Pkt., 15c. Oz., 30c. 1/4 Lb., 80c. Lb., \$2.35. Postpaid.

(187/20) GHERKINS CUCUMBER—For Pickling Only

60 days. Small fruits covered with spines. For pickling only. Not only very resistant to disease but the vines are exceedingly long lived and continue to bear nearly all summer even from early plantings. The small fruit are borne by the hundreds even on only a vine or two.

Pkt., 15c. Oz., 40c. 1/4 Lb., \$1.00. Postpaid.

EGGPLANTS *Bear All Summer*

Hastings'
Eggplants
Are Uniform

CULTURE—In the lower South seed should be sown in hot beds or frames in January or February. In the latitude of Atlanta hot beds should be started between February 15th and March 15th. Care should be taken as eggplant will not germinate freely in an average temperature less than 65 degrees. When plants have made the fourth or fifth pair of leaves, 4 to 6 weeks old, they may be set in open ground, if danger of frost is past, placing them 2 feet apart each way. Cultivate often. In Florida, sow June-July for fall and early winter shipping crop. Packet makes plants for 100 ft. row. Oz. makes about 2,000 plants. Use 1/4 to 1/2 Lb. seed for plants to set an acre.

1870/20 NEW HAMPSHIRE HYBRID EGGPLANT *Extra Early, Dwarf, Prolific*

ALL-AMERICA SELECTION 73 days from plants. Superb new extra early, vigorous, and prolific variety for home gardens and market. Plants rather small with heavy crops of medium size, rather blocky, highly marketable fruit. Try it sure for home and market use.

The tops are cut and chopped and used for flavoring and garnishing. Very mild onion flavor and quite a favorite in the kitchen of many expert gourmets. Keep some growing in pots or beds. **Pkt., 25c. 3 for 60c. Postpaid.**

203/20 LARGE CARENTAN LEEK

In rich soil, well earthed up, the edible portion is 6-8 in. long by 2-3 in. thick. The largest variety, an exceptionally hardy garden sort that gives a very appetizing addition to the year round planting. Although similar to flavor of onions it is distinct as a variation for those who relish vegetables of this nature. Large Carentan is the best garden variety and is profitable for market purposes. **Pkt., 15c. Oz., 60c. 1/4 Lb., \$1.50. Lb., \$4.75.**

Genuine
Kentucky
Bibb Lettuce

CULTURE—Sow in rich, well prepared soil, as soon as cold winter is past, or start in beds or frames for transplanting in early spring 6 to 12 in. apart, in rows 15 to 18 in. apart. Cover seed 1/2 in. in beds or outdoors. Seed germinates quickly and growth is best in cool weather. Good heads depend on good seed, keeping a steady growth with fertilization, moisture and cultivation. Light feeding, as with nitrate of soda, after plants have some size, is beneficial. Plants must be kept growing steadily if you want them to head. Loose-leaf types may be thinned and used as they become crowded. **Oz. plants 200 ft. row; use 3 Lbs. per acre or 1 Lb. for transplanting.** Days given are average from seed to market size.

221/20 Genuine KENTUCKY BIBB LETTUCE (Baby Heads)

Small Butterheads. 65 days. A very distinct variety of lettuce that has long been the favorite for salads in Kentucky, where it originated. It possesses a crispness and flavor all its own and once grown you'll never again be without it. The heads are very small, somewhat loose in form, with outer leaves a deep, glossy green, rich in vitamins, while the interior blanches to a rich yellowish green, tender and delicious. Bibb lettuce grows the same as other varieties except that plants are set only 6 inches apart, because of their small size. Start seed early to transplant very early in spring to head before real hot weather. Can also be planted in late August, in most sections, for a fall crop.

Pkt., 15c. Oz., 50c. 1/4 Lb., \$1.25. Lb., \$3.50. Postpaid.

207/20 PREMIER GREAT LAKES LETTUCE (Early)

ALL-AMERICA SELECTION **All-America Winner. 75 days. Crisp Leaf.** Premier Great Lakes, like Great Lakes, makes a good solid head of crisp leaves—typical "Iceberg" type for home gardens or markets. It is heat and drought resistant which means so much to those who garden in the South, and it stands exceedingly well and long before bolting to seed.

Pkt., 15c. Oz., 60c. 1/4 Lb., \$1.75. Lb., \$5.50. Postpaid.

216/20 GENUINE ICEBERG HEAD LETTUCE

CRISP LEAF HEADS—82 days. Genuine Iceberg is exceedingly tender, crisp-leaved hard-header. Splendid for open-ground planting or forcing. This is a large, full-season favorite with crisp and wavy, fringed, light green leaves, bronzy tinged at edges in certain seasons.

Pkt., 15c. Oz., 35c. 1/4 Lb., 85c. Lb., \$2.50. Postpaid.

209/20 MIGNONETTE—BABY ICEBERG LETTUCE

CRISP LEAF HEADS—65 days. A delightful first early, delicious, curled or crisp, small heading lettuce especially adapted to outdoor winter crop growing in the lower South and for cold-frame culture farther North. An easy home garden grower. Superb to serve whole as a salad.

Pkt., 15c. Oz., 40c. 1/4 Lb., \$1.25. Lb., \$3.50. Postpaid.

ALL-AMERICA SELECTION **CRISP HEADS—82 DAYS. STANDS HOT WEATHER.**

All-America Winner. Fine, new crisp leaved, solid headed lettuce. It holds into hot weather longer than any other variety tested and retains its crisp, tender, richly green, iceberg flavor to delight the most fastidious, and to make delicious salad bowls and other light summer dishes that both keep you cool and well supplied with Vitamins A and B1.

Pkt., 15c. Oz., 50c. 1/4 Lb., \$1.50. Lb., \$4.50. Postpaid.

217/20 PARIS COS FRENCH HEAD LETTUCE—TRY IT!

66 days. Romaine, the Celery Lettuce, so-called because of its erect growth. Best in cool weather, thinned to 8 in. apart in rows. Outside leaves dark green, inside much lighter and blanch to white with slight greenish tint. Crisp, tender, self-folding leaves, succulent and sweet, with delicate flavor. Very fine for salad.

Packet, 15c. Oz., 35c. 1/4 Lb., 85c. Lb., \$2.50. Postpaid.

Loose-Leaf Non-Heading Lettuce

219/20 RUBY (SALAD)—1958 ALL-AMERICA

LOOSE LEAF TYPE. A beautiful new red ruffled leaf novelty lettuce to grace any table as an attractive salad or to chop into mixed salads. Easy to grow. **Pkt., 25c. 3 for 60c.**

218/20 SALAD BOWL—ALL-AMERICA LETTUCE

ALL-AMERICA SELECTION **Loose Leaf Type.** Novelty lettuce superbly suited to making delicious summer salad bowl mixtures. It has dark green, vitamin loaded leaves in large, loose clusters, easily grown and harvested. **Pkt., 25c. each. 3 for 60c. Oz., 75c. 1/4 Lb., \$2.25. Postpaid.**

214/20 GRAND RAPIDS—The Quick Growing Lettuce

LOOSE LEAF TYPE—45 days. Best of all for forcing. Quick growing, hardy, upright, making a loose cluster of large savoyed or crimped leaves. Very attractive for garnishing and leaves hold up after cutting.

Vine Ripened **CANTALOUPE**s are the **BEST!**

*Plant Early and Cultivate Carefully
For Sweetest Flavor and Best Size*

CULTURE—Plant in rather rich loamy soil after soil is warm in spring, in hills at least 4 ft. apart each way. Use 600 pounds high grade fertilizer per acre drilling deeply in rows on which hills are made or in which seed are later drilled. Drop 8 to 9 seeds to each hill and thin out to 3 or 4 strong plants. Cover 1 in. in loamy soil and cultivate as for Cucumbers, keeping all weeds and trash cleared out to allow free and uninterrupted growth of the crop itself until fully matured. Use Sabadilla Dust for insects and Bordeaux Mixture for disease, see page 64. Use one pound cantaloupe seed per acre.

(255/10) New Congo
Watermelon

YOUR WATERMELON SEED FOR GARDEN OR MARKET

There's more to watermelon seed production than merely cutting or grinding the melons and washing and drying the seeds. Good seed comes only from good breeding and careful selection of the planting and together with growing, harvesting and handling with quality the main objective. Such is the way Hastings' Seeds are handled. We carefully inspect each operation to see that you, our customer, gets the seed that will "come up what you buy."

CONGO SELLS FOR MORE MONEY IN EVERY MARKET

90-95 days, 40 Lbs. Congo is a long but thick melon alternately striped dark and light green. The vines stay green much longer than almost any other because it is highly resistant to anthracnose spot on the leaves and melons. It is very solid with medium thick, very tough rinds, has a beautiful deep red heart and is of excellent flavor. It is quite heavy and just can't miss as a top market melon and still it is of home garden quality. Late plantings bear practically until frost!

This great new shipping melon has solid flesh of superb red color and most delicious flavor. Together with a thin but very tough rind it can readily withstand market handling with minimum damage. Its remarkable resistance to the worst melon diseases makes it worthy of "top billing" in your plans for this year. All markets like something new if it is good. Charleston Gray (test number 51-27) is certainly good. All our seed is certified true Charleston Gray and the pounds are shipped to you in the original sealed certified packages.

PRICES. Sealed bags only. 263/10 CHARLESTON GRAY. Pkt., 15c. Oz., 35c. 1/4 Lb., 90c. Lb., \$2.75. 5 Lbs., \$12.50. 10 Lbs., \$20.00. Postpaid.

WATERMELON CULTURE

Plant in fresh or new ground after soil is thoroughly warm in spring. Make hills preferably 8 ft. apart in 10-ft. rows. 600-800 pounds of good commercial guano is recommended. Drop about 8 seeds in each hill, and thin out to 3 or 4 strong plants after rough leaves have formed. Cover seeds 1 inch in loamy soil and cultivate often until vines prevent; then pull out weeds and grass. Spray vines regularly with good fungicide to prevent premature dying of the vines resulting in small, pale or white fleshed melons. Treat seed with Arasan for protection from soil borne disease except wilt, which may be controlled by using our Congo, Charleston Gray, Blacklee and Wilt Resistant Dixie Queen. Avoid using nitrates or other nitrogen fertilizer as a top or side dressing. This frequently causes white or hollow hearts.

Tender Spring **ENGLISH PEAS**

HOW TO GROW SWEETEST EARLY PEAS

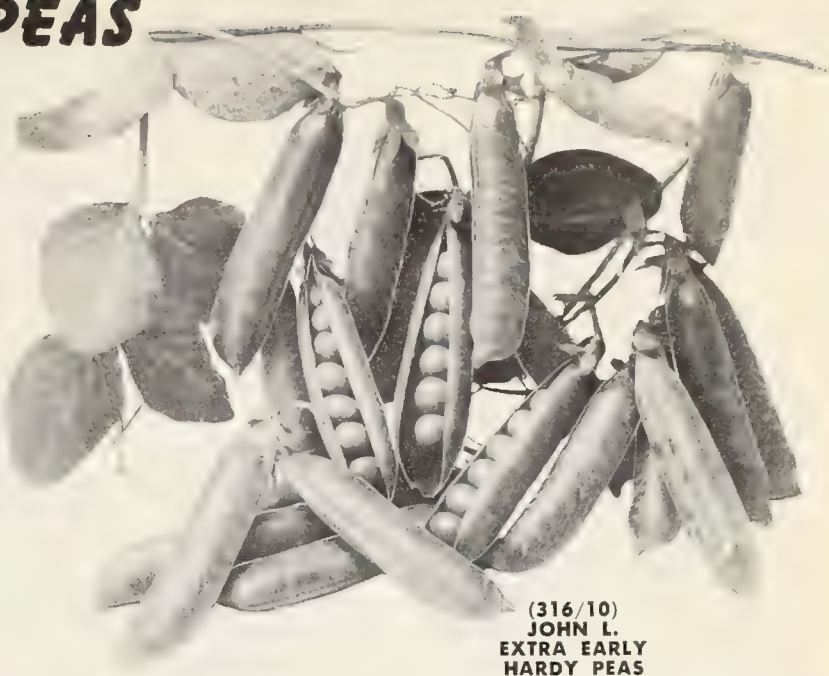

The secret of growing the sweetest, tenderest and most delicious English Peas is to start them very early in heavily manured, rich soil, planting them about 1-2 inches deep and gradually working soil to them to insure plenty of moisture at all times. After the pods are well formed keep them picked regularly to continue bearing. Plant $\frac{1}{2}$ lb. for 50 ft. of row.

To KITCHEN or MARKET with RUTGERS!

(437/20) Everbearing Scarlet Globe

446/20 Improved RUTGERS (Red)

**Wilt-Resistant—
Heat-Resistant**

72 days. Scarlet fruit. Plant large with thick, sturdy, vigorous foliage. The fruits are brightest red, smooth with thick walls and small seed cells, ripening from center outward. Superbly suited for slicing, for canning, or for quality juice. Rutgers has demonstrated its value particularly with its heavy foliage growth to prevent sunburning during hot weather and on lighter soils. We are specially proud of the superb quality of **Hastings' Improved Rutgers Tomato Seed** because we use so much care in seeing to it that our seed crops not only have top breeding but that special care is used in saving all the crop for seed. Our seed is never the by-product of a tomato canning or juicing factory, the unreliable source of most cut-price seed flooding the markets. **Pkt., 15c. 1/2 Oz., 40c. Oz., 75c. 1/4 Lb., \$2.25. Lb., \$6.95. 5 Lbs., \$29.75. Postpaid.**

Whether you garden for your own use and pleasure or for market, Hastings' seeds for Southern planting can be depended upon.

Tremendous Productivity FOR GARDENS—FOR MARKET

(446/20) Rutgers

462/20 SUPER-MARGLOBE (RED TOMATO)

Selected and Wilt-Resistant

80 days from plants, scarlet fruit. Our newest super-strain of the great main crop, scarlet-fruited variety, originated by the U. S. Dept. of Agriculture for wilt-resistance. It is also resistant to nail-head rust. Fruits are medium size, smooth, solid and deep from stem to blossom ends. They are in clusters of 5 to 7, on vines with medium to heavy growth. Cell structure is irregular. The popular globe shape, scarlet color, a good cropper, marketer and shipper. We believe our strain to be the best and most uniform in existence, and recommend it to you unhesitatingly for home garden, for canning or for market. We believe there is no better seed grown!

Selected Seed Only. Packet, 15c, 1/2 Oz., 50c. Oz., 90c. 1/4 Lb., \$2.50. Lb., \$7.95. Postpaid.

459/20 SCARLET DAWN (RED TOMATO)

Early Selected and Wilt-Resistant

ALL-AMERICA SELECTION Gold Medal, All-America. 58 days from plants, scarlet fruit. Scarlet Dawn is of deep Marglobe-red color, globe-shaped, earliest maturing, a heavy and continued bearer of beautiful fruits. Vines are strong, foliage open but ample to prevent sun-scald, with large clusters of medium-large, heavy, meaty fruits. Tomatoes have thick walls and small core. **Pkt., 15c. 1/2 Oz., 60c. Oz., \$1.00. 1/4 Lb., \$3.25. Lb., \$9.75. Postpaid.**

SOUTHERN TOMATO CULTURE

Fresh, Ripe Tomatoes are Rich in Vitamins A, B₁ and C

TOMATO CULTURE—Allow 4 to 5 weeks for seed to make plants for setting out. Extra earlies such as Super Early Wonder mature from spring plantings in 85 to 90 days, late sorts (Rutgers) in 110 to 115 days. In the Atlanta latitude start seed in hot-beds or boxes in the house between February 15 and March 1. Give plenty of light and space between the plants or they will be weak and spindling. Scatter seed in bed or box thinly and cover with about 1/2 in. of soil, after treating seed with Arasan. Transplant to open ground as soon as danger of frost is past. Before transplanting, break the soil deeply and work in stable manure or fertilizer thoroughly. Set plants 3 ft. apart each way; give clean cultivation. As plants grow it is best to tie them to stakes and thin out the leaves so the sun can penetrate and ripen the fruit quicker. A second seed planting made in May will make plants that begin to bear in August and continue until frost. **Oz. makes about 1,000-2,000 good plants. Use 1/4 Lb. seed for 6,000 plants per acre. Garden size Arasan, 25c.**

Plant only wilt resistant varieties where tomato wilt exists in the soil. Spray blossoms with Fruitone (25c pkt.) to insure best set of fruit.

437/20 EVERBEARING SCARLET GLOBE TOMATO (RED)

Selected and Wilt-Resistant

72 days. Best of all. Wonderful new, smooth, solid, heavy and long bearing, handsome, delicious, scarlet Tomato. It will make you love tomatoes more than ever—so heavy, meaty, luscious and just the right medium-large size. A week earlier than Marglobe, and the most uniform and everbearing of any we have ever seen. Excellent for home gardens, markets and shipping. **Pkt., 15c. 1/2 Oz., 60c. Oz., \$1.00. 1/4 Lb., \$2.95. Lb., \$8.95. Postpaid.**

HASTINGS' LAWN FERTILIZER

Shipping Charges Extra

10-6-4, 25% organic. A specially blended turf builder with 25% organic content. Leading turf authorities have constantly stressed the importance of fertilizers of high nitrogen content hence our 10% level of nitrogen. This is compiled with 6% Phosphate and 4% potash for proper balance.

Park, golf and cemetery superintendents have long made up their own similar formulations —now we offer it to the home gardener to help provide proper feeding to insure beautiful lawns.

The high nitrogen level lowers the quantity needed, only 25 pounds per 1,000 sq. ft. for most grasses for each feeding. So it's said, "Hastings' Lawn Fertilizer costs less because it goes twice as far."

Feed summer grasses such as Bermuda, Zoysias and St. Augustine in February, April, June and September. Feed cool season grasses such as Poas, Bluegrass and Fescues in September, December and March. (HLF/10) 50 Lbs., \$3.50; 250 Lbs., \$17.25; 1,000 Lbs., \$65.00.

(RF/10) RELIANCE AZALEA AND CAMELLIA SPECIAL FERTILIZER

The recommended food for all acid-loving plants such as broadleaved evergreens, dogwoods, boxwoods and others. The scientific formula is a result of countless experiments and filed by John L. Cope, famous fertilizer and Camellia authority.

1. Maintains proper soil acidity.
2. Promotes healthier root growth.
3. Builds vigorous, beautifully foliated plants more resistant to disease and rigorous weather.
4. Provides nourishment for proper setting of buds.
5. Provides food requirements for development of magnificent blooms of surpassing loveliness.

Full directions on the package. 25 Lbs., \$1.80; 50 Lbs., \$3.00; 100 Lbs., \$5.60.

(RRF/10) RELIANCE ROSE SPECIAL FERTILIZER
Again Reliance brings us an outstandingly fine plant food. Properly formulated on a scientific basis for proper development of the root system, stems and leaves as well as beautiful flowers of the rose.

The healthy rose, properly fed, can better withstand rigorous weather, disease and insect damage.

Use 4 pounds per 100 square feet of rose bed at each feeding. For best results feed in March, May and August. 25 Lbs., \$1.80; 50 Lbs., \$3.00; 100 Lbs., \$5.60.

(SM/10) RAMSHORN SHEEP MANURE

Permanently improves all soils and makes better and brighter gardens. This natural plant food is prepared by a special direct heat drying and sterilizing process that kills all weed seeds, and also supplies all the essential plant food elements in a neutral form, easily digested by plants. Manures increase the water holding capacity of the soil and lessen damage from droughts. Dried and pulverized Sheep Manure is concentrated such that a 100-pound bag equals in value a sizeable wagon load of raw manure. It is far easier and more pleasant to use, too.

Sheep Manure is ideal for all plants and full directions for application are in every bag. For old lawns apply 7 to 10 lbs., and in preparing new lawns 10 to 12 lbs. per 100 sq. ft. For flowers use a handful mixed with the soil under each new plant or 10 to 12 lbs. per 100 sq. ft. of bed area. For shrubs, vines and trees use 1 to 10 lbs. according to size. PRICES: 50 Lbs., \$2.15. 100 Lbs., \$4.20. 200 Lbs., \$8.00. 500 Lbs., \$19.00. 1 Ton, \$68.00. F.O.B. Atlanta. By Freight Charges collect.

KEEP YOUR PLACE LIVELY WITH WILD BIRDS -

FEED THEM HASCO WILD BIRD FOOD

BIRD CAFETERIA PROVED IN THE SOUTH

Hasco Wild Bird Food contains Canary, Hulled Oats, Kafir, Milo, Sunflower, Wheat, Millets, Rice, Benne, Flax, Peanut hearts and others. Before formulating Hasco Wild Bird Food we asked the birds what they wanted to eat and they asked for Hasco Wild Bird Food.

Here's how it was done. We put up four bird cafeterias located miles apart in different bird type areas. From these testing stations we found what ingredients the various Southern birds would eat. Hasco Wild Bird Food is made up of all the ingredients the birds liked best. **It's the best Southern wild bird food made - - - anywhere.** The preference for various ingredients by the birds was measured here in the South. These tests were not made out West, in the East, or up North, but right here in the South.

Make your yard a gathering place of beautiful, interesting, useful birds. Their colorful beauty, interesting nesting activities, joyous song and **appetite for insects** make them a wonderful asset for your garden.

It's Easier to Shop by Mail—We Are as Near as Your Mail Box

HASTINGS' BRANCH STORES We are very proud of our three branch stores located at 2205 Second Ave., N., Birmingham, Ala.; at 715 Cherry St., Chattanooga, Tenn., and our newest Garden Shopping Center—4500 N. Independence Blvd., Charlotte, N. C. In these stores we offer genuine Hastings' quality and service and are delighted for you to call by to see us at these locations if you live in or visit these great Southern cities. Please send mail orders directly to Atlanta, however, for quicker service.

OUR NEW ATLANTA RETAIL STORES For the convenience of our Atlanta friends and those shopping in Atlanta we maintain fully stocked stores at 434 Marietta St., N. W., at our new location (with access to the street parking) 64 Pryor St., N. E., and our magnificent new 'Hastings' Garden Center' (with plenty of parking) corner Lindbergh Dr. and Buford Highway.

C. O. D. NOTICE Absolutely no plants or other perishable goods will be sent C. O. D. We advise against C. O. D. orders because of delays and high collection charges which are unsatisfactory to the customer and expensive to us if uncalled for and returned at our expense. We accept C. O. D. orders for seeds in exceptional cases when 25% of the order amount is paid in advance.

GUARANTEE. H. G. Hastings Co. guarantees to the extent of the purchase price that seeds, bulbs and plants sold are delivered or forwarded in growing condition and are as described on the tags or labels (seeds within recognized tolerances as to germination and purity). We give no further warranty or guarantee, express or implied. We do not accept responsibility for soil, seasonal, planting or cultural conditions which would affect the performance or productiveness of the seeds, bulbs and plants we sell as such factors would be beyond our control.

If the purchaser does not accept such purchases on these terms, they are to be returned in good condition for refund of any amounts paid for them. We have the full confidence of years of experience in the products we sell but we cannot foresee and control the many other factors necessary for success.

This is the responsibility the purchaser must accept.

FOREIGN SHIPMENTS We cannot accept orders for plants, bulbs or garden accessories for shipments outside the United States because of many rules and regulations that are so costly. We sometimes accept orders for seeds only but to countries having postal arrangements with this country. All postage or shipping and packing charges on foreign shipments are in addition to the prices of any and all seeds quoted.

YOU PAY THE POSTAGE When you order any kind of seeds at "Not Prepaid" or "F. O. B." prices stated in the catalog, you pay the postage, express or freight. The same applies to quantity lots of bulbs and to plants listed at "Not Prepaid" or F. O. B. prices.

When you order seeds in 10 to 100-pound lots or over at "Not Prepaid" prices you can have the seeds sent to you by parcel post, express or freight but you must pay the transportation charges. 70 pounds is parcel post limit.

Large F. O. B. trees cannot be sent by mail. They are too large and the P. O. will not accept them. They must be sent by Express, or by motor freight. Rail freight is generally too slow.

When you order your seeds to come by express or freight we can send them "collect" so you may pay the transportation charges on delivery. If you want F. O. B. orders (those not too large) to be sent by parcel post the postage must be paid IN ADVANCE and you must send us the amount of postage in addition to the cost of the order.

Your Postmaster and generally your R. F. D. Carrier can tell you what zone you are in from Atlanta.

HOW TO FIGURE POSTAGE First figure up the weight in pounds on "Not Prepaid" items you are ordering. Then find what zone you are in from Atlanta. Take the number of pounds you are ordering in the first column and read straight across to your zone column and the amount shown is the postage to send us in addition to the cost of the seed, so we can prepay the postage.

As an example we will suppose that you want to order 15 pounds, a peck of corn with bag containing it. If you lived in either the 1st or 2nd postal zones from Atlanta the amount to be sent us in addition to the price of the corn would be 79c; for the 3rd zone 96c; for the 4th zone \$1.21 and so on. With the table shown it's very easy to figure it exactly, once you know what your zone number is.

If at all in doubt as to your zone be sure and send enough to cover necessary postage. If you send too much, the surplus will be returned to you.

Seventy pounds is the Postal weight limit. If larger quantities are wanted it will have to be split into two or more shipments.

WE PAY THE POSTAGE (Within U. S. A. only.) On all seeds in this catalog listed in packet, half ounce, ounce, quarter pound, half pound, pound, 2-pound, 5-pound quantities, we pay the postage when so indicated (otherwise please add postage) and guarantee safe delivery by mail. We pay the postage on plants and bulbs except in larger sizes or quantities where a "Not Prepaid" or F. O. B. price is named. F. O. B. (free on board) means that we turn the package over to the freight or express company and that customer accepts full responsibility for transportation charges, usually collected at the time of delivery.

Please add postage on orders for grasses, clovers, field seeds, garden and pet supplies as noted.

Hastings'
PECAN

Luxuriant shade

Profitable nut crops

HIGH QUALITY and FLAVOR—
 FINGERNAIL - THIN SHELLS—
 GORGEOUS SHADE. Shells so thin
 they may be easily cracked by hand,
 coming out whole or in halves for
 ideal table use as well as for com-
 mercial purposes.

Be the first to grow this wonderful
 new HASTINGS' PECAN. Rapid,
 vigorous-growing tree with rather
 large foliage to make superb shade
 as well as good crops of nuts. Ideal
 for the back or front yard. Bears in
 4 to 6 years.

Treat the HASTINGS' PECAN
 the same as other grafted varieties
 with spacing 60 x 60 (12 trees per
 acre) in large plantings.
